NA =
Ground Service not available

Use the first three digits of your zip code and the chart above to determine your UPS shipping zone in relation to our shop. For example, for zip code 02184 you would use UPS Ground Zone 7 since the first three digits of 02184 fall between 010 – 043 on the chart above. Next, take the total weight of your order in pounds from your order blank (See p. 27) and use the UPS Rate Chart on p. 26 to see the amount UPS will charge to send a package of that weight to you. If your zip code has the designation "not available" next to it then UPS Ground Service is not possible to your area and we will mail your order to you. Most areas of the country are served by UPS Ground Service therefore, we do not include a zone or rate chart for postal shipments. The cost is quite similar. UPS includes insurance up to \$100 value in their rates on p. 26. Insurance is additional on shipments sent with the US Postal Service.
